

We are closing our kombucha brewery and are therefore selling all of our equipment. Our equipment is 1.5 years old, in great condition, just like new.

We produced kombucha, and had a capacity of production of 10'000 bottles a month. This infrastructure can be used to product any kind of sparkling drinks.

We are willing to negotiate on the selling of the entire business, as well as individual equipments. Feel free to reach out to us.

Here's a complete list of the items to sell. Prices listed are for new, we sell used. Please contact us for prices, as it will depend on what you are interested in taking.
