

LINDR T TOWER

The LINDR T dispensing tower with eight taps is part of the very first comprehensive line of dispensing towers we have designed.

This series has the greatest variability in the number of taps, from two to ten. Thanks to the more subtle construction with a smaller spacing of the taps, the tower can be used in areas with a lack of space.

LINDR T6

LINDR T8

| BENEFITS AND USEFUL FEATURES

SIMPLE CONSTRUCTION - The tower has a simple construction.

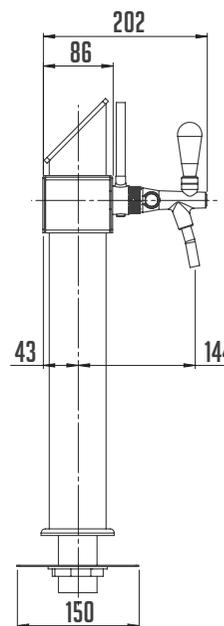

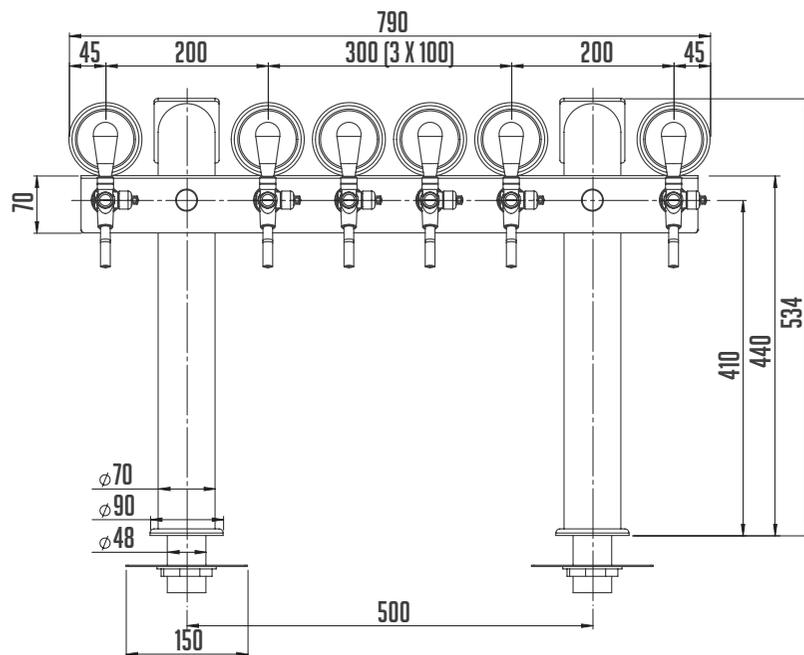

VARIABILITY OF THE NUMBER OF TAPS - The LINDR T range of towers offers the widest range of number of taps from two to ten.

DESIGN - The surface treatment is possible in polished stainless steel or with sandblasting.

EASY COOLING - The tower has a simple recirculation coil.

MORE SUBTILE DESIGN - Thanks to the smaller spacing between taps, which is 100 mm, the tower allows you to dispense more types of beverages in a relatively small area.
